

MUSTANG 22™

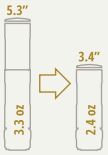

With ADAPT™ Modular Technology

EXTREME LIGHTWEIGHT.

Our lightest suppressor yet, the Mustang22 is constructed of 7075 aircraft-grade aluminum. Utilizing our ADAPT™ modular technology, the Mustang22 has multiple configurations to meet your needs.

TOP FEATURES

ADAPT™ Modular Technology

Now you don't have to choose between a short rifle suppressor and a long one. With ADAPT™ Modules you get two lengths with one tax stamp. So you can have a shorter and lighter suppressor in seconds compared to months.

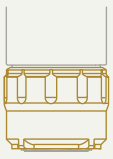

Keyed Baffles

Indexing tabs provide repeatable return to zero after user servicing. The Mustang22 uses keyed baffles that create a gas seal to prevent carbon and gas build up between the tube and baffles for ease of disassembly.

No First Round Pop

The Mustang22 features class leading suppression and no first round pop in the standard configuration.

Strategic Engraving

We strategically place the engraving on the thickest cross section of the Titanium mount for fast and easy replacement should the suppressor become damaged beyond repair.

UNCONDITIONAL LIFETIME WARRANTY

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
