OBSIDIAN45™

With ADAPT™ Modular Technology

THE QUIETEST 45 ON THE MARKET.

Perfectly balanced between durable and lightweight, the Obsidian45™ has ultimate versatility via our ADAPT™ Module. The Obsidian45 is rated for practically all center-fire pistol calibers, along with common lever-action calibers which makes it a must-have for your armory.

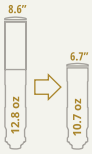

TOP FEATURES

Strategically Placed Engraving

We strategically place the serialized engraving over the thickest Stainless Steel cross section of the suppressor. This allows fast and easy repairs should the suppressor become damaged beyond repair.

ADAPT™ Modular Technology

Now you don't have to choose between a short rifle suppressor and a long one. With ADAPT™ Modules you get two lengths with one tax stamp. So you can have a shorter and lighter suppressor in seconds compared to months.

17-4 Stainless Steel Baffles

Obsidian45 baffles are machined from 17-4 Stainless Steel barstock. This allows for more cleaning options and increases durability. Our baffles also create a gas seal to prevent carbon build up between the baffles and tube for ease of maintenance.

Non-slotted Piston

The Obsidian9/45 uses a non-slotted design creating a full circumference gas seal. This drastically lowers gas blowback for a more enjoyable shooting experience. Obsidian9/45 pistons are cross compatible with SilencerCo™ slotted pistons.

UNCONDITIONAL LIFETIME WARRANTY

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
